

BANYAN GOLD CORP.
FINANCIAL STATEMENTS

FOR THE NINE MONTHS ENDED

JUNE 30, 2025

(Unaudited - Prepared by Management)

Notice of Disclosure of Non-auditor Review of Interim Financial Statements

Pursuant to National Instrument 51-102, Part 4, subsection 4.3 (3)(a) issued by the Canadian Securities Administrators, if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the financial statements have not been reviewed by an auditor.

The accompanying unaudited interim financial statements of the Corporation, for the interim period ended June 30, 2025, have been prepared in accordance with International Financial Reporting Standards and are the responsibility of the Corporation's management.

The Corporation's independent auditors have not performed a review of these interim financial statements in accordance with the standards established by the Canadian Institute of Chartered Accountants for a review of the interim financial statements by an entity's auditor.

Dated this 15th day of August 2025.

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

1. NATURE AND CONTINUANCE OF OPERATIONS

Banyan Gold Corp. (the "**Company**", "**Corporation**" or "**Banyan**"), was incorporated as Banyan Coast Capital Corp. by a Certificate of Incorporation issued pursuant to the provisions of the Alberta Business Corporations Act ("**ABCA**") on July 26, 2010. The address of the Company's corporate office is Suite 510, 1100 Melville Street Vancouver, British Columbia, V6E 4A6. These financial statements were approved and authorized for issuance by the Board of Directors on August 15, 2025.

The Company commenced trading on January 27, 2011, and trades under the symbol BYN on the TSX Venture Exchange (the "**Exchange**"). Beginning January 17, 2022, the Company has been trading on the OTCQB Venture Market in the United States under the symbol BYAGF.

These financial statements are presented on an ongoing concern basis, which assumes the Company will continue to realize its assets and discharge its liabilities in the normal course of operations.

The Company does not generate cash flows from operations and has, therefore, relied principally on the issuance of equity securities to finance its operation activities to the extent that such instruments are issuable under terms acceptable to the Company.

If future financing is unavailable, the Company may not be able to meet its ongoing obligations, in which case the realizable values of its assets may decline materially from current estimates. The financial statements do not include any adjustments to the amounts and classification of assets and liabilities that might be necessary should the Company be unable to continue operations.

2. BASIS OF PRESENTATION

The Company's interim financial statements have been prepared in accordance with IFRS Accounting Standards ("IFRS") as issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC"). These unaudited condensed interim financial statements have been prepared in accordance with IAS 34, Interim Financial Reporting. The accounting policies applied in the preparation of these unaudited interim condensed financial statements are consistent with those applied and disclosed in the Company's audited consolidated financial statements for the year ended September 30, 2024.

The preparation of these financial statements requires management to make certain estimates, judgments and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported expenses during the period. Actual results could differ from these estimates.

Significant assumptions about the future and other sources of estimation uncertainty that management has made at the end of the reporting period, that could result in a material adjustment to the carry amounts of assets and liabilities in the event that actual results differ from assumptions made, relate to, but are not limited to, the following:

- i) the recoverability of receivables which are included in the statements of financial position;
- ii) the inputs used in accounting for stock-based compensation expense, which are included in the statement of operations;
- iii) recoverability of future income tax asset;
- iv) recoverability of exploration and evaluation expense asset;
- v) the valuation of the rehabilitation provision; and
- vi) the valuation of share-based payments transactions.

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

Expressed in Canadian Funds

3. MATERIAL ACCOUNTING POLICIES

Foreign exchange

The functional currency is the currency of the primary economic environment in which the entity operates. The functional currency is the Canadian dollar. The functional currency determinations were conducted through an analysis of the consideration factors identified in IAS 21, *The Effects of Changes in Foreign Exchange Rates*.

Transactions in currencies other than the Canadian dollar are recorded at exchange rates prevailing on the dates of the transactions. At the end of each reporting period, the monetary assets and liabilities of the Company that are denominated in foreign currencies are translated at the rate of exchange at the statement of financial position date, while non-monetary assets and liabilities are translated at historical rates. Revenues and expense are translated at the exchange approximating those in effect on the date of the transactions. Exchange gains and losses arising on translation are included in the statements of loss and comprehensive loss.

Cash and cash equivalents

Cash and cash equivalents are comprised of cash on hand and Guaranteed Investment Certificates in banks.

Financial instruments

Financial assets and financial liabilities are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

i. Classification and measurement of financial assets

All recognized financial assets that are within the scope of IFRS 9 are required to be subsequently measured at amortized cost or fair value on the basis of the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets, specifically:

- debt investments that are held within a business model of which objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are subsequently measured at amortized cost;
- debt investments that are held within a business model of which objective is both to collect the contractual cash flows and to sell the debt instruments, and that have contractual cash flows that are solely payments of principal and interest on the principal amount outstanding, are subsequently measured at fair value through other comprehensive income (FVTOCI); and

all other debt investments and equity investments are subsequently measured at fair value through profit or loss (FVTPL).

Despite the foregoing, the Company may make the following irrevocable election/designation at initial recognition of a financial asset:

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

3. MATERIAL ACCOUNTING POLICIES (continued)

- the Company may irrevocably elect to present subsequent changes in fair value of an equity investment that is neither held for trading nor contingent consideration recognized by an acquirer in a business combination to which IFRS 3 applies in other comprehensive income; and
- the Company may irrevocably designate a debt investment that meets the amortized cost or FVTOCI criteria as measured at FVTPL if doing so eliminates or significantly reduces an accounting mismatch.

In the current year, the Company has not designated any debt investments that meet the amortized cost or FVTOCI criteria as measured at FVTPL.

When a debt investment measured at FVTOCI is derecognized, the cumulative gain or loss previously recognized in other comprehensive income is reclassified from equity to profit or loss as a reclassification adjustment. In contrast, for an equity investment designated as measured at FVTOCI, the cumulative gain or loss previously recognized in other comprehensive income is not subsequently reclassified to profit or loss. Debt instruments that are subsequently measured at amortized cost or at FVTOCI are subject to impairment.

Impairment of financial assets

In relation to the impairment of financial assets, IFRS 9 requires an expected credit loss ("ECL") model as opposed to an incurred credit loss model under IAS 39. The expected credit loss model requires the Company to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition of the financial assets. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognized. Specifically, IFRS 9 requires the Company to recognize a loss allowance for expected credit losses on debt investments subsequently measured at amortized cost. In particular, IFRS 9 requires the Company to measure the loss allowance for a financial instrument at an amount equal to the lifetime ECL if the credit risk on that financial instrument has increased significantly since initial recognition, or if the financial instrument is a purchased or originated credit-impaired financial asset. On the other hand, if the credit risk on a financial instrument has not increased significantly since initial recognition (except for a purchased or originated credit-impaired financial asset), the Company is required to measure the loss allowance for that financial instrument at an amount equal to 12 months ECL. IFRS 9 also provides a simplified approach for measuring the loss allowance at an amount equal to lifetime ECL for trade receivables, contract assets and lease receivables in certain circumstances.

i. Classification and measurement of financial liabilities

IFRS 9 requires that the changes in the fair value of the financial liability that is attributable to changes in the credit risk of that liability be presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss, but are instead transferred to retained earnings when the financial liability is derecognized. Previously, under IAS 39, the entire amount of the change in the fair value of the financial liability designated as at FVTPL was presented in profit or loss. The application of IFRS 9 has had no impact on the classification and measurement of the Company's financial liabilities: accounts payable and accrued liabilities continue to be subsequently measured at amortized cost.

ii. General hedge accounting

The general hedge accounting requirements retain the three types of hedge accounting. However, greater

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

3. MATERIAL ACCOUNTING POLICIES (continued)

flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an “economic relationship”. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about the Company’s risk management activities have also been introduced.

The Company does not apply the hedge accounting to its financial instruments.

Impairment of non-financial assets

At the end of each reporting period, the Company’s assets are reviewed to determine whether there is any indication that those assets may be impaired. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment, if any. The recoverable amount is the higher of fair value less costs to sell and value in use. Fair value is determined as the amount that would be obtained from the sale of the asset in an arm’s length transaction between knowledgeable and willing parties. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount and the impairment loss is recognized in the profit or loss for the period. For an asset that does not generate largely independent cash inflows, the recoverable amount is determined for the cash generating unit to which the asset belongs.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but to an amount that does not exceed the carrying amount that would have been determined had no impairment loss been recognized for the asset (or cash-generating unit) in prior years. A reversal of an impairment loss is recognized immediately in profit or loss.

Property Plant and Equipment

At acquisition, the Company records property and equipment at cost, including all expenditures incurred to prepare an asset for its intended use. These expenditures consist of: the purchase price, broker’s commissions, and installation costs including architectural, design and engineering fees, legal fees, survey costs, site preparation costs, freight charges, transportation insurance costs, duties, testing and preparation charges.

The Company capitalizes costs that meet the asset recognition criteria. Costs incurred that do not extend the productive capacity or useful economic life of an asset are considered repairs and maintenance expenses and are accounted for in the profit and loss in the period.

The Company provides for amortization using the declining balance method at rates designed to amortize the cost of the property over their estimated useful lives. The annual amortization rates are as follows:

Automotive	30%
Computers	55%
Camp Equipment	30%

Depreciation of property and equipment utilized in the exploration of assets, including mine exploration, is recapitalized as exploration and evaluation costs attributable to the related asset.

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

3. MATERIAL ACCOUNTING POLICIES (continued)

Interest income

Interest income is recognized as it accrues in the statement of loss and comprehensive loss, using the effective interest method.

Loss per share

The Company presents basic loss per share for its common shares, calculated by dividing the loss attributable to common shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted loss per share does not adjust the loss attributable to common shareholders or the weighted average number of common shares outstanding when the effect is anti-dilutive.

Share-based payments

The Company may grant stock options to acquire common shares of the Company to directors, officers, employees and consultants. An individual is classified as an employee when the individual is an employee for legal or tax purposes, or provides services similar to those performed by an employee.

The fair value ("FV") of stock options is measured on the date of grant, using the Black-Scholes option pricing model, and is recognized over the vesting period. Consideration paid for the shares on the exercise of stock options is credited to share capital.

In situations where equity instruments are issued to non-employees and some or all of the goods or services received by the entity as consideration cannot be specifically identified, they are measured at FV of the share-based payment. Otherwise, share-based payments are measured at the fair value of goods or services received.

Flow-through Shares

Resource expenditure deductions for income tax purposes related to exploratory activities funded by flow-through share arrangements are renounced to investors in accordance with income tax legislation. Pursuant to the terms of the flow-through share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. At year end, the Company bifurcates the flow-through share into (i) a flow-through share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability, and (ii) share capital. Upon expenses being incurred, the Company derecognizes the liability and recognizes a deferred tax liability for the amount of tax reduction renounced to the shareholders. The premium is recognized as other income and the related deferred tax is recognized as a tax provision.

Proceeds received from the issuance of flow-through shares are restricted to be used only for Canadian resource property exploration expenditures within a two-year period. The Company may also be subject to a Part XII.6 tax on flow-through proceeds renounced under the Look-back Rule, in accordance with Government of Canada flow-through regulations.

During the past year, the Company has raised funds which were considered "flow through funds" within the meaning of the Income Tax Act (Canada) which will be used to incur "Canadian exploration expenses" as defined in subsection 66.1(6) of the Income Tax Act (Canada) (the "Tax Act"). The Company may be required to indemnify the holders of such shares for any tax and other costs payable by them in the event the Company has not made the required exploration expenditures. At the end of the quarter, the Company had a remaining balance to spend

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

3. MATERIAL ACCOUNTING POLICIES (continued)

Flow-through Shares (continued)

on “flow through mining expenditures”, as defined in subsection 127(9) of the Tax Act, related to calendar 2024 of \$ Nil.

Income taxes

The income tax expense or benefit for the year consists of two components: current and deferred. Income tax expense is recognized in the statements of comprehensive loss except to the extent it relates to an item recognized directly in equity or other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable profit or loss for the year. Current tax is calculated using tax rates and laws that were enacted or substantively enacted at the reporting date in each of the jurisdictions and includes any adjustments for taxes payable or recovery in respect of prior periods.

Deferred tax is recognized using the liability method, on temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. However, the deferred tax is not recognized if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit nor loss. Deferred tax is determined using tax rates (and laws) that have been enacted or substantially enacted by the reporting date and are expected to apply when the related deferred tax asset is realized or the deferred tax liability is settled. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilised. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Mineral exploration and evaluation expenditures

Costs that are directly related to exploration and evaluation expenditures are recognized and capitalized, in addition to the acquisition costs. These direct expenditures include such costs as: materials used, surveying costs, geological costs, drilling costs, travel to and from the site, and payments made to contractors. Government grants related to exploration assets are accounted for by deducting the value of the grant from the carrying value of the asset. Costs not directly attributable to exploration and evaluation activities, including general and administrative overhead, are expensed in the year in which they occur.

Rehabilitation provision

Banyan is subject to government laws and regulations relating to environmental disturbances caused by exploration and evaluation activities. The Company records the present value (“PV”) of the estimated costs of restoration obligation in the year in which the obligation is incurred. When the liability is recognized, the PV of the estimated costs is capitalized by increasing the carrying amount of the related exploration properties. The discounted liability is increased for the changes in PV based on current market discount rates and liabilities specific risks.

5. SHARE CAPITAL (continued)

Current Year

On March 14, 2025, the Company completed a non-brokered private placement financing of \$14.5 million.

The private placement consisted of (i) 32,000,000 common shares (the "**Premium FT Shares**"), which qualify as "flow-through shares" (within the meaning of subsection 66(15) of the Income Tax Act (Canada) (the "**Tax Act**"), at a price of \$0.336 per Premium FT Share, for gross proceeds of \$10,752,000; (ii) 7,838,000 common shares (the "**FT Shares**"), which qualify as "flow-through shares" (within the meaning of subsection 66(15) of the Tax Act), at a price of \$0.285 per FT Share, for gross proceeds of \$2,233,830 and (iii) 6,298,000 common shares (the "**HD Shares**") at a price of \$0.24 per HD Share for gross proceeds of \$1,511,520, for aggregate gross proceeds to the Company of \$14,497,350 (the "**Offering**"). There were no warrants, finders fee or commissions issued for the Offering.

The Premium FT Shares, FT Shares and HD Shares were issued pursuant to applicable private placement exemptions and are subject to a hold period under Canadian securities laws expiring July 15, 2025. The Company will use the gross proceeds raised pursuant to the issuance of Premium FT Shares and FT Shares to incur (or be deemed to incur) eligible "Canadian exploration expenses" that qualify as "flow-through mining expenditures" (as both terms are defined in the Tax Act) related to the Company's projects in the Yukon (the "**Qualifying Expenditures**"), on or before December 31, 2026, and to renounce all the Qualifying Expenditures in favour of the subscribers of the Premium FT Shares and FT Shares effective December 31, 2025. The net proceeds raised pursuant to the issuance of the HD Shares will be used for general and administrative expenses.

Prior Year

On June 20th and June 21st, 2024, the Company completed a brokered private placement financing of \$14.3 million.

The Private Placement consisted of 23,150,000 LIFE flow-through shares ("**LIFE FT Shares**") at a price of \$0.38 per LIFE FT Share, 14,720,000 flow-through shares ("**FT Shares**") at a price of \$0.34 per FT Share and 1,850,000 common shares (which were not flow-through shares) ("**HD Shares**") at a price of \$0.27 per HD Share (together the "**Offering**") for gross proceeds of \$14,301,300.

Each LIFE FT Share and FT Shares were issued as a flow-through share within the meaning of the Income Tax Act (Canada). Proceeds from the sale of the LIFE FT Shares and FT Shares will be used to incur Canadian exploration expenses as defined in Subsection 66.1(6) of the Income Tax Act and flow-through mining expenditures as defined in Subsection 127(9) of the Income Tax Act. Such proceeds will be renounced to the subscribers with an effective date not later than December 31, 2024.

Subject to compliance with applicable regulatory requirements and in accordance with National Instrument 45-106 – Prospectus Exemptions ("**NI 45-106**"), LIFE FT Shares were purchased by residents in Canada and/or other qualifying jurisdictions pursuant to the listed issuer exemption and were free trading. The remaining shares were subject to the customary 4 month plus 1 day hold period.

5. SHARE CAPITAL (continued)**Stock Options**

The Company has established a stock option plan (the "**Plan**") for the directors, officers, employees and consultants of the Company. The Plan is administered by the Board of Directors of the Company who establish the exercise prices, vesting conditions and expiry date of the options in accordance with the requirements imposed by the Exchange.

The aggregate number of shares assumable upon the exercise of all options granted under the Plan shall not exceed 10% of the issued and outstanding shares reserved for the issuance to (a) any individual director or officer which will not exceed 5% of the issued and outstanding common shares, and (b) all consultants which will not exceed 2% of the issued and outstanding common shares.

No options were issued during the quarter ended June 30, 2025, however stock based compensation of \$615,319 incurred during the current quarter as the result of the following vesting:

5,700,000 total options issued on December 14, 2023 under 18 month vesting:	\$ 226,426
750,000 total options issued on June 3, 2024 under 18 month vesting:	\$ 33,893
8,000,000 total options (5 & 10 yr) issued on Dec 5, 2024 under 18 month vesting:	<u>\$ 355,000</u>

Total **\$ 615,319**

At the end of the quarter ended June 30, 2025, the following share options were outstanding to directors, officers and advisors:

Number	Exercise Price	Expiry Date
1,750,000	\$ 0.23	December 9, 2025
2,600,000	\$ 0.24	May 11, 2026
2,699,900	\$ 0.32	December 16, 2026
400,000	\$ 0.395	February 24, 2027
425,000	\$ 0.45	September 07, 2027
1,300,000	\$ 0.45	December 21, 2027
500,000	\$ 0.32	September 11, 2028
5,700,000	\$ 0.30	December 13, 2028
750,000	\$ 0.31	June 3, 2029
400,000	\$ 0.22	September 24, 2029
2,400,000	\$ 0.21	December 5, 2029
1,100,000	\$ 0.25	February 24, 2030
6,250,000	\$ 0.45	December 21, 2032
5,600,000	\$ 0.21	December 5, 2034
<u>31,874,900</u>		

Prior Year

1,250,000 stock options were issued on June 3, 2024, exercisable at \$0.31 for 5 years. These options expire on June 3, 2029. The fair value of stock options granted is estimated on this date, using the Black-Scholes option pricing model, with the following assumptions:

Risk-free interest rate	3.50%
Estimated volatility	44.7%
Expected Life	5 years

BANYAN GOLD CORP.**NOTES TO THE FINANCIAL STATEMENTS**

*These Properties are collectively referred to as AurMac Property or Project in Corporate disclosure documents

Aurex and McQuesten (together the “AurMac Project”)

On May 24, 2017, the Corporation completed the definitive agreements on the Aurex and McQueston properties subject to TSX Venture approval and in the case of Alexco Resource Corp., requiring the consent of Silver Wheaton and the Government of Canada. The agreements provided for the Corporation to acquire up to 100% of the Aurex Property (“Property”), from Victoria Gold Corp. (“**Victoria**”) and up to 100% of the McQuesten Property, from Alexco Resource Corp. (“**Alexco**”). The Aurex and McQuesten gold properties are contiguous, comprising 8,230 hectares and 1,000 hectares respectively and are both highly prospective for intrusive-related gold mineralization, and include areas of historic gold production (lode and placer), in the prolific Mayo Mining District, Yukon Territory.

Highlights of Aurex Agreement with Victoria Gold Corp.:

Under the terms of the binding Letter Agreement with Victoria, Banyan may earn up to 100% interest in the Aurex property in three (3) stages:

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

Expressed in Canadian Funds

6. EXPLORATION AND EVALUATION ASSET (continued)

- Initial 51% Option Interest – **COMPLETED**. The Company was required, over a period of four (4) years, to issue in stages a total of 3 million common shares in the capital of the Company, and to incur in stages minimum exploration expenditures totaling \$1.6 million on the Property. Banyan will act as the Property's operator during the initial four-year term and has the option to defer expenditures into a 5th year. Following the earning of the 51% Option Interest, a joint venture ("JV") will be formed and Banyan will have the ability to elect to earn an additional 24%.
- Additional 24% Interest – **COMPLETED**. In order to earn the Additional 24% Interest, such that Banyan would have an aggregate interest of 75% in the Property, Banyan will be required to spend an additional \$3.5 million in exploration expenditures over five (5) years. Upon having earned the Additional 24% Interest, Banyan will continue to act as the Property's operator and may elect to earn an additional 25%.
- Additional 25% interest – In order to earn the Additional 25% Interest, such that Banyan would have an aggregate interest of 100% in the Property, within two (2) years of earning 75% Banyan must pay Victoria \$2 million cash or shares and grant Victoria a 6% net smelter return ("NSR") royalty with buybacks totaling \$7 million to reduce to a 1% NSR royalty on Au and a 3% NSR royalty on Ag.

Highlights of McQuesten Agreement with Victoria Gold Corp.:

Under the terms of the binding Letter Agreement, Banyan may earn up to a 100% interest in the McQuesten property in three (3) stages:

- Initial 51% Option Interest – **COMPLETED**. The Company was required, over a period of four (4) years, to issue a total of 1.6 million common shares in the capital of the Company, and to incur in stages minimum exploration expenditures totaling \$1.6 million on the Property. Banyan will act as the Property's operator during the initial four-year term and has the option to defer expenditures into a 5th year. Following the earning of the 51% Option Interest, a joint venture ("JV") will be formed and Banyan will have the ability to elect to earn an additional 24%.
- Additional 24% Interest – **COMPLETED**. The Company was required, within three years, to spend an additional \$1 million in exploration expenditures, and pay Victoria Gold \$600,000 in cash or Common Shares of Banyan. Upon having earned the additional 24% interest, Banyan will continue to act as the property's operator and may elect to earn an additional 25%.
- Additional 25% Interest – In order to earn the McQuesten additional 25% interest, such that Banyan would have an aggregate interest of 100% in the property, within two years of earning 75%, Banyan must pay now Victoria Gold \$2 million in cash or Common Shares, deliver a preliminary economic assessment ("PEA") and grant Victoria Gold a 6% NSR royalty with buybacks totaling \$7 million to reduce the royalty to a 1% NSR royalty on Au and a 3% NSR royalty on Ag.

NOTE – On May 3, 2022, Victoria Gold Corp. bought the underlying interest in the McQuesten Agreement from Alexco Resource Corp. As part of Banyan's agreement to this transfer, the requirement for a Preliminary Economic Assessment was moved to December 2025 and the requirement for a Pre-Feasibility was eliminated.

In March 2021, the Parties ("**Victoria Gold Corp., Alexco Resources Corp. and Banyan Gold Corp.**") decided to defer formalizing a joint venture as Banyan continues to work under the definite agreement terms to earn additional interest in the Properties.

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

Expressed in Canadian Funds

AurMac Mineral Resource

An updated NI 43-101 7.0 Million ("M") Ounce gold Mineral Resource Estimate ("MRE") for the AurMac Project was prepared by Marc Jutras of Ginto Consulting Inc. with an effective date of February 6, 2024 with the report filed on Sedar+ on May 30, 2025.

This has been superseded on July 8, 2025 by a new Mineral Resource Estimate ("MRE") for the AurMac Project which included the first Indicated Resource on the Project. Please see Subsequent Events at the end of this report.

Nitra Claims

The Nitra Claims are 1,442 claims (296 km²) that have been staked by Banyan 5 km to the west of the AurMac property and is 100% owned.

Aurex Extension

The Aurex Extension is a claim group covering 401 claims immediately adjacent to the Aurex Project and is 100% owned.

Hyland

The Company has an interest in the Hyland Gold Project and is located in the Watson Lake Mining District of southeast Yukon, approximately 74 kilometres northeast of the town of Watson Lake. The Hyland Gold Project consists of 927 claims totaling over 18,620 hectares.

Victoria Gold Corp. Receivership

As at March 31, 2025, the Company is the registered and beneficial legal owner of a 75% right, title and interest in the Aurex and McQuesten properties ("Properties"). The Company acquired its 75% interest in the Properties pursuant to option agreements held by Victoria Gold Corp. ("Victoria"). Under the terms and conditions of its agreements with Victoria, the Company continues to hold the exclusive right to act as operator to conduct further work on the Properties, and the exclusive right and option, to acquire the remaining 25% interest in the Properties, currently held by Victoria.

In August 2024, Victoria was placed in receivership under the management of Pricewaterhouse Coopers ("PwC"). At the date of these unaudited statements, lien applications have been made against Victoria's interest in the Properties. The applications have not been heard in court and the applicants have not performed work on the Properties. The option agreements remain in good standing, however, given that Victoria is in receivership, there could be delays and additional legal costs associated with the removal of the liens and in the registration of the Company's acquisition of Victoria's remaining 25% interest in the Properties.

Please see **Subsequent Events** for details on a 100% earn in update with PricewaterhouseCoopers ("PwC"), the receiver for Victoria Gold Corp.

8. RELATED PARTY TRANSACTIONS

During the quarter, \$153,000 (2024 - \$141,501) was billed to the Corporation by officers and directors of the Company. \$84,000 (2024 - \$80,001) was billed by KECM Services, a company controlled by the CEO, \$47,250 (2024 - \$45,000) was billed by 2572231 Alberta Corp., a company controlled by the CFO. \$21,750 (2024 - 16,500) was paid to the directors for their quarterly stipend.

9. FINANCIAL AND CAPITAL RISK MANAGEMENT

Fair value estimates are made at the reporting date, based on relevant market information and other information about the financial instruments. Fair values are determined directly by reference to published price quotations in an active market, when available, or by using a valuation technique that uses inputs observed from the markets.

The Company classifies its fair value measurements within a fair value hierarchy, which reflects the significance of the inputs used in making the measurements.

Level 1 – Unadjusted quoted prices at the measurement date for identical assets or liabilities in active markets.

Level 2 – Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

9. FINANCIAL AND CAPITAL RISK MANAGEMENT (continued)

Level 3 – Significant unobservable inputs which are supported by little or no market activity.

All of the Company's cash and cash equivalents are assessed to be in Level 1.

The fair market value of the Company's receivables, payables and accruals approximate their carrying amount due to their short-term nature.

a) Credit Risk

Credit risk is the risk of loss associated with a counter party's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to its cash balances. The Company manages its credit risk on bank deposits by holding deposits in high credit quality banking institutions in Canada. Management believes that the credit risk with respect to receivables is remote.

b) Liquidity Risk

The Company's approach to managing liquidity risk is to ensure that it will have sufficient capital to meet liabilities when due after taking into account the Company's holdings of cash that might be raised from equity financings.

As at June 30, 2025, the Company had a cash and equivalents of \$17,880,022 (2024 - \$18,486,392) and current liabilities of \$2,257,400 (2024 - \$1,107,841). All of the Company's accounts payable and accrued liabilities have contractual maturities of less than 60 days and are subject to normal trade terms. Current cash balances will allow the Company to continue to operate without requiring a financing in the September 30, 2025 fiscal year.

c) Interest Rate Risk

Interest rate risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not believe a change by 1% in interest rate will have a significant impact on the fair value of its cash equivalents.

d) Foreign Currency Risk

The Company's reporting currency is in Canadian dollars and major transactions are denominated in Canadian dollars. Therefore, the Company's currency risk is not significant.

Capital Disclosures

The Company manages its capital, consisting of shareholders' equity, in a manner consistent with the risk characteristics of the assets it holds. All sources of financing are analyzed by management and approved by the board of directors.

The Company's objectives when managing capital are:

- i) to safeguard the Company's ability to continue as a going concern; and

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

9. FINANCIAL AND CAPITAL RISK MANAGEMENT (continued)

- ii) to facilitate potential acquisitions.

The Company is meeting its objective of managing capital through its detailed review and performance of due diligence on all potential acquisitions, preparing short-term and long-term cash flow analysis to ensure an adequate amount of liquidity and monthly review of financial results. As disclosed previously, there are restrictions on the use of cash.

There were no changes in the Company's approach to capital management during the period ended June 30, 2025

10. LOSS PER SHARE

Diluted loss per share for the periods ended June 30, 2025 and 2024 is the same as basic loss per share. The impact of the exercise of the outstanding share options in the money in 2025 did not change the loss per share on a rounded basis.

11. SUBSEQUENT EVENTS

July 8, 2025 – Updated Mineral Resource Estimate (“MRE”)

On July 8, 2025, Banyan released an updated MRE for the AurMac Project with the first Interred Mineral Resource Component (see Table 1 below). The full report will be posted on SEDAR* within 45 days.

The updated MRE comprises an Indicated Mineral Resource of **2.274 million (“M”) ounces (“oz”) of gold (“Au”)** (112.5 M tonnes at 0.63 g/t) and an Inferred Mineral Resource of **5.453 Moz** of Au (280.6 M tonnes at 0.60 g/t) (as defined in the Canadian Institute of Mining, Metallurgy and Petroleum (“**CIM**”) Definition Standards for Mineral Resources & Mineral Reserves incorporated by reference into NI 43-101). The updated MRE is summarized below in **Table 1 (Figure 1)**. The AurMac Project pit constrained MRE is contained in two near/on-surface deposits: The Airstrip and Powerline deposits.

Table 1: Pit-Constrained Indicated and Inferred Mineral Resources – AurMac Project

		Indicated MRE			Inferred MRE		
Deposit	Au Cut-Off Grade (g/t)	Tonnage (Tonnes)	Gold Grade (g/t)	Gold Content (Oz)	Tonnage (Tonnes)	Gold Grade (g/t)	Gold Content (oz)
Airstrip	0.30	27.7	0.69	0.611	10.1	0.75	0.245
Powerline	0.30	84.8	0.61	1.663	270.4	0.60	5.208
Total Combined	0.30	112.5	0.63	2.274	280.6	0.60	5.453

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

Notes to Table 1:

1. The effective date for the MRE is June 28, 2025 and was prepared by Marc Jutras, P.Eng., M.A.Sc., Principal, Ginto Consulting Inc., an independent "Qualified Person" within the meaning of NI 43-101.
2. Mineral Resources which are not Mineral Reserves do not have demonstrated economic viability. The estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, changes in global gold markets or other relevant issues.
3. The CIM Definition Standards were followed for classification of Mineral Resources. The quantity and grade of reported Inferred Mineral Resources in this estimation are uncertain in nature and there has been insufficient exploration to define these Inferred Mineral Resources as an Indicated Mineral Resource.
4. Mineral Resources are reported at a cut-off grade of 0.30 g/t gold for all deposits, using a US\$/CAN\$ exchange rate of 0.73 and constrained within an open pit shell optimized with the Lerchs-Grossman algorithm to constrain the Mineral Resources with the following estimated parameters: gold price of US\$2,050/ounce, US\$2.50/t mining cost, US\$10.00/t processing cost, US\$2.00/t G+A, 90% gold recoveries, and 45° pit slopes.¹
5. The number of tonnes and ounces was rounded to the nearest thousand. Any discrepancies in the totals are due to rounding effects.

July 24, 2025 – Banyan Accelerates the Earn-In at AurMac Project

On July 24, 2025 the Corporation announced it has entered into a definitive agreement (the "Agreement") with PricewaterhouseCoopers Inc., the court appointed receiver and manager ("PwC" or "Receiver") of all of the assets, undertakings and properties of Victoria Gold Corp. ("Victoria"), to accelerate Banyan's options to acquire the remaining interests in the McQuesten and Aurex properties from Victoria, together which comprise the core of the AurMac Project ("AurMac" or "AurMac Project") (the "Transaction").

Under the terms of the Agreement, Banyan will pay Victoria \$2.0M in cash upon closing and as contemplated in the original option agreements, issue to Victoria a Net Smelter Return royalty ("NSR") on the McQuesten and Aurex properties. Banyan will pay Victoria a further \$1.6M (the "Second Payment") in cash or shares (at Banyan's election) within 75 days of closing.

The Agreement and NSR contain the following additional benefits to Banyan and its shareholders:

- The requirement for Banyan to complete a Preliminary Economic Assessment in respect of the McQuesten property by December 8, 2025 is eliminated;
- Certain rights of first offer in respect of financing of a mining operation on the McQuesten property in favour of Victoria Gold are eliminated;
- Banyan's option to reduce the NSR issued to Victoria from 6% to 1%, for a one-time cash payment has been reduced from an aggregate of \$14.0M, as contemplated in the original option agreements, to \$10.0M; and
- Certain pre-existing royalties on a portion of the McQuesten and Aurex properties held by Victoria and Banyan will be cancelled prior to closing.

Closing is expected to take place by the end of August. If Banyan elects to make the Second Payment in shares, closing will be subject to the approval of the TSX Venture Exchange. Prior to closing, the Receiver will obtain a vesting order from the Ontario Superior Court of Justice (Commercial List) approving the Agreement and vesting in Banyan the McQuesten and Aurex properties free of all encumbrances, other than certain permitted encumbrances as defined in the Agreement.

¹ The gold price and cost assumptions are consistent with current pricing assumptions and costs and, in particular, with those employed for recent technical reports for similar pit-constrained Yukon gold projects.

BANYAN GOLD CORP.

NOTES TO THE FINANCIAL STATEMENTS

For the periods ended June 30, 2025 and 2024

Expressed in Canadian Funds

August 7, 2025 – Change of Auditors

On August 7th, 2025 the Corporation changed its auditors from GEIB & Company ("**Former Auditor**") to De Visser Gray LLP, Chartered Accountants ("**Successor Auditor**") until the next Annual General Meeting of the Corporation.

The Former Auditor has not expressed a modified opinion in its reports for the two most recently completed fiscal years of the Corporation, nor for the period from the most recently completed period for which Former Auditor issued an audit report in respect of the Corporation. There are no reportable events including disagreements, consultations, or unresolved issues as defined in National Instrument 51-102 – Continuous Disclosure Obligations ("**NI 51-102**") (Part 4.11) between the Corporation and its Former Auditor.
